Hi Mary,

As discussed I left the speech in the very long format...I forgot to ask if we should take out or leave CCR, so its still in there.

The presentation right now is all EPA @50 – will be working to add in the slide on **metro Atl AQ** as discussed, a slide on **Atlantic Station**, as well as the **OZ tool**, zoomed into metro Atl.

If you see **blue highlights**, still working on fleshing those out...the end of the Chattahoochee story, Atl/GA specific Brownfields info, Atlantic Station story, etc.

I dropped in the bullet about Cesar's COVID food recovery webinar at the end of a sustainability blurb at the end of the document, highlighted yellow, if approved we can get better talking points on it.

LCR is in there twice, once with Lead, generally, and once with Water.
